

Situated on a quarter of the world's richest topsoil, in an area with unrivaled agricultural tradition and a history of scientific discovery, there's an emerging innovation center appropriately named Cultivation Corridor.

In this uniquely fertile environment, world-class agri-business, agbioscience, biorenewable and biotechnology industries converge – building on shared knowledge and taking advantage of exceptional opportunities for large-scale biobased research and development. Access to prime agricultural real estate, essential infrastructure, cutting-edge technology, plentiful academic and professional talent and a diverse network of symbiotic peripheral industries ranging from insurance to advanced manufacturing further support this forward-thinking Corridor.

Positioned at a rare intersection of favorable economic and lifestyle factors, the region also enjoys an exceptional quality of life. Top-rated schools, some of the nation's safest neighborhoods and trusted Iowa values help Cultivation Corridor to attract the nation's best and brightest minds.

And when powerhouse industries, capable people and rich resources come together, the potential is limitless. It's why Iowa's fertile Cultivation Corridor is so distinctly positioned to produce the science that feeds the world.

The science that feeds the world.
